

CAPTEK™ REGISTERED LABORATORY Letter of Authenticity

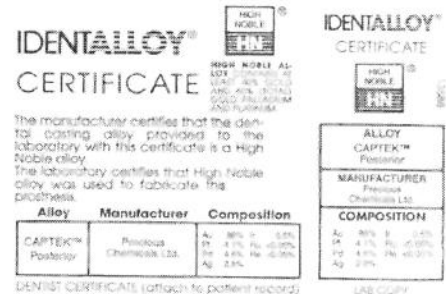

Captek™ Precious Chemicals Inc. validates that China Dental Outsourcing Dental Lab is approved to provide authentic Captek™ restorations.

Only Captek™ trained and registered laboratories are authorized to provide Captek™ restorations. Captek™ laboratories undergo an initial training to learn proper fabrication techniques of the unique Captek™ technology. Continuous interaction with the Captek™ technical staff is suggested to achieve and maintain the highest standards.

It is not uncommon for Captek™ Laboratories to act as providers of substructures to non-registered Captek™ labs. This practice is referred to as outsourcing and is an acceptable practice that is endorsed and supported by Captek™.

Registered Captek™ Laboratories receive technical support via virtual web meetings, phone conferences, and on site visits. Captek™ laboratories are updated on fabrication techniques and technologies, provided with on-demand troubleshooting, and are advised on clinical indications for Captek™.

In addition to our technical support, Captek™ is a voluntary participant of the Identalloy® program. Identalloy® is designed to prove material traceability, content identification and authenticity. Cases delivered from a Captek™ trained and registered laboratory should have an Identalloy® sticker accompanying the case showing "Precious Chemicals" as the material manufacturer.

Captek™ is the only 'metal composite' system for crowns and bridges. Captek™ is University tested esthetic and strong, in addition to being clinically proven to repel harmful plaque and bacteria.

CALL TODAY for further information regarding the Captek™ material, our technical support program, or Registered Captek™ Laboratories.
